Location: 11120 International Dr, Rancho Cordova, CA Section/Unit: CCSAS Project/Technical Development Bureau/Systems Management/200
Salary Range: \$4611-5882/\$5064-6465 Number of Vacancies: 1

Job Description: (includes typical duties)

This is an exciting job opportunity with the Franchise Tax Board working on the California Child Support Automation System Project. The successful candidate will work with a group of Technical Architects and Specialists to design, build, and maintain a state of the art system.

Under general direction and supervision of the Supervising Technical Architect, the SSS is expected to work independently and as part of Project Teams using a variety of systems management technology performance testing skills and apply these skills to solve business and technological problems. The incumbent will work closely with other members of the Systems Management Section and Business Partners to help define and document architecture, requirements, designs, processes, and procedures related to system performance testing and capacity planning. The SSS is responsible for complex system performance testing activities and capacity management activities, including identifying, implementing and verifying system performance testing tools and processes for monitoring, measuring, reporting and providing problem determination.

Required Knowledge, Skills, Abilities:

- Experience with Web-Based thin client or multi-tier distributed system design.
- 1 year or more of experience designing and implementing systems using Java, J2EE, and EJB Specifications
- 1 year or more of experience working with Relational Databases and data models
- 1 year or more of experience working with Large Unix Based Systems.
- Excellent oral and written communication skills.

Desirable Experience/Qualifications:

- Experience with performance testing and tuning of large scale applications
- Experience working with Mercury Load Runner
- Experience working with Tivoli Workload Scheduler
- Experience working with Java Messaging Service and/or other messaging technologies.
- Experience working with Rational Application Developer based on the Eclipse Framework
- Experience with J2EE security (policies, role-based authorization).
- Ability to effectively communicate technical information to a non-technical audience.
- Experience managing system software in a large computing environment
